New Promotions January 1 – June 30, 2016

Premium Solutions

Whether you work as a microbiologist in basic research or applied sciences, in clinical or industrial areas, at Eppendorf you will always find flexible solutions to prepare, handle, and analyze your samples and cells. Besides the right consumable, you can choose between several Liquid Handling solutions, instruments for

various applications, accessories to organize your lab routine, and a range of accompanying maintenance and service contracts.

Our new Eppendorf Advantage™ special offers include Eppendorf premium products ideally suited for the most important steps of your microbiology workflow.

FREE
Carousel stand¹

* Actual bundles may vary from the image.

Get your lab up and running fast with Eppendorf's 3-, 4-, and 6- packs of Research® plus and Reference® 2 pipettes!

Research plus—The Research plus is remarkably light both in terms of weight and pipetting forces, setting new standards for ergonomic operation. It also features a spring loaded tip cone that ensures a secure seal, low attachment forces, and easy ejection. Furthermore, it is fully autoclavable.

Reference 2—In addition to all the features above, the Reference 2's one-button design minimizes the risk of aerosol contamination and reduces thumb strain even further.

Promotional offer

- > Save up to 23 %² with 3-, 4-, and 6-pipette bundle packs
- > FREE carousel stand included in delivery package with Research plus and Reference 2 6-packs (a \$152 value)

Repeater stream

 Easypet 3 bundle
savings on
pipette 6-pack²

* Actual bundles may vary from the image.

Get your lab fully equipped with all the essential liquid handling devices. Choose a special 6-pack bundle that includes either 6 Research® plus or Reference® 2 pipettes, a carousel stand, a Repeater stream¹, and an Easypet 3.

The Eppendorf Repeater/Combitips® systems are renowned for accuracy and precision even when pipetting liquids other than water or working through highly repetitive pipetting tasks. The Repeater stream is ergonomic and has a counter feature that keeps track of your work even when interruptions arise.

The Easypet 3 is lightweight and well balanced with intuitive speed control and a vibrant battery indicator. It is the perfect instrument to accompany Eppendorf's new Serological Pipets.

Promotional offers

- > Savings of up to 38 %³ off on Special 6-pack bundles including 6 single-channel pipettes (Research plus or Reference 2), a carousel stand, Easypet 3², and Repeater stream¹

Centrifuge 5424/5427 R Offers

Bundled savings on centrifuge 5424 or 5427 R with 3-pack of pipettes!

Eppendorf centrifuges go beyond speed and capacity to benefit you and your lab environment. Eppendorf centrifuges offer unparalleled ergonomic operation, advanced temperature management for maximum sample protection, and eco-friendly features for energy-savings. Centrifuge 5424 is the new laboratory standard, with 24-place capacity and speed up to 21,130 $\times g$. Centrifuge 5427 R is the high-throughput device for molecular biology, with 48-place capacity and speed up to 25,000 $\times g$.

Vacufuge® plus Complete System Offer

The Eppendorf Vacufuge plus is an ergonomic, intuitive, durable, and extremely flexible vacuum concentrator. Its advanced heating technology provides the best treatment for your samples. The Vacufuge plus can be used as a vacuum concentrator, centrifuge, or desiccator—depending on your application needs. Four heating levels, three application modes, and a choice of 15 rotors (for 0.2 mL to 50 mL tubes, microplates, and PCR plates) ensure outstanding versatility.

The new coated lid provides superior chemical resistance against aggressive acids and organic solvents (e.g. TFA, DMSO).

The instrument is available in three configurations. The Complete System included in this promotion comes with an integrated PTFE diaphragm pump, a condensation trap (purifies exhaust air up to 85%), and rotor F-45-48-11 (for 48 x 1.5/2.0 mL microcentrifuge tubes).

Promotional offer

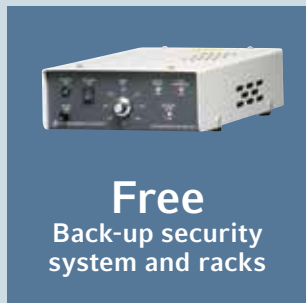

> Buy a Vacufuge plus with integrated pump and 48 x 1.5/2 mL rotor, receive a Centrifuge 5424 for FREE (a \$3,662 value)

Mastercycler® nexus gradient Offer

In the age of networking, the Mastercycler nexus gradient is your reliable companion when it comes to your daily PCR routine. It is easy to use, and requires little space or energy—what else do you need from a thermal cycler?

The Mastercycler nexus gradient can accommodate 96-well PCR plates, 0.2 mL PCR tubes, 0.1 mL PCR tube strips, 0.2 mL PCR tube strips, and 0.5 mL PCR tubes. This flexibility allows PCR users to select the consumables that best fit their assays. With less than 40 dB[a] noise emission, the Mastercycler nexus gradient is whisper quiet, while also being energy efficient.

HeatSealer S100 Offer

Every laboratory uses different types of plates. In order to obtain reliable assay results, plates need to be sealed tightly and in a reproducible manner. The same is true for sample storage. A tight seal is very beneficial to ensure your sample is securely stored until you need it again, particularly for long term storage.

The new HeatSealer S100 is a small, extremely user friendly instrument for reliable sealing of different plate formats. Our available set of adapters enables you to seal almost any plate. (Adapters must be purchased separately.)

Promotional offer

> From January 1 until June 30, 2016, you can save 20 % on the purchase of an Eppendorf HeatSealer S100

Eppendorf Galaxy[®] CO₂ Incubator Offers

FREE
Split inner door
upgrade

Eppendorf Galaxy CO₂ Incubators are ideally suited for virtually any cell culture application. Consistent temperature and CO₂ stability create the perfect incubation conditions, while features such as the seamless chamber and 120 °C High Temperature Disinfection (HTD) make them easy to clean and ensure a contamination-free environment.

Galaxy 170 S CO₂ incubators are high-capacity, 170 liter incubators that can be conveniently placed on or under the bench or even double stacked. The six-sided direct heating profile ensures optimal temperature stability while the infrared sensor delivers accurate CO₂ control. Optional 4-split inner doors allow for easy access to samples while reducing gas consumption and decreasing recovery time. Discover the superior quality, outstanding performance, and intuitive operation of Eppendorf CO₂ Incubators.
